FAA and ARP Overview

How does the FAA work?

Presented to: ACC 101
By: Kent Duffy, APP-400
Date: April 19, 2021

**Federal Aviation
Administration**

**We are
Airports**

Agenda

- **FAA Airports Organization (ARP)**
- **FAA Overview**
 - Example Processes

Office of Airports—Mission and Functions

Mission:

World leaders in creating a safe and efficient system of airports

Vision:

Advancing the safest, most efficient airport system in the world

Values:

Integrity, Collaboration, Innovation

- **Core Functions**

- Establish standards
- Safety oversight and airport certification
- Planning
- Noise and environmental assessments
- Financial assistance programs
- Compliance

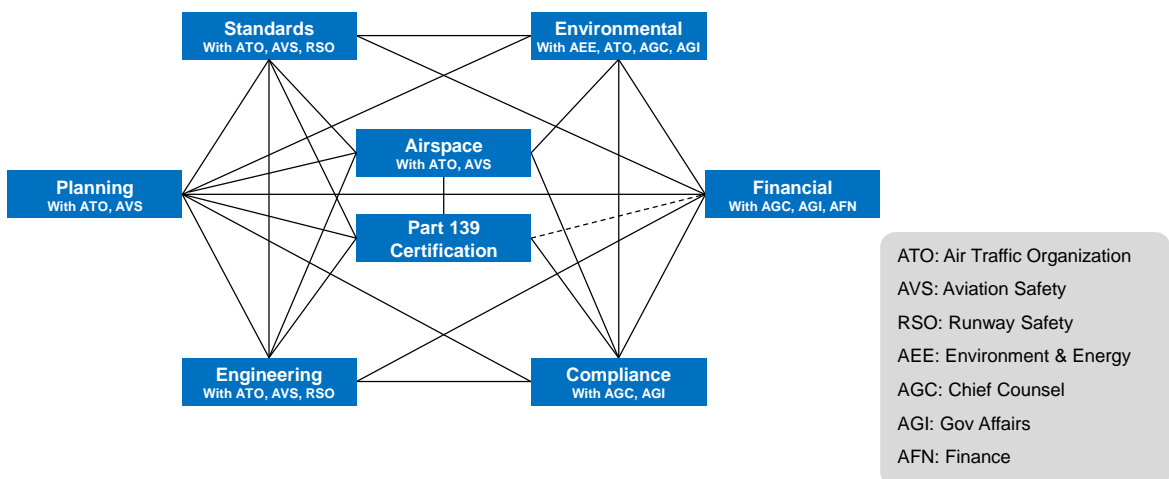

U.S. system of airports by the numbers

as of October 1, 2020

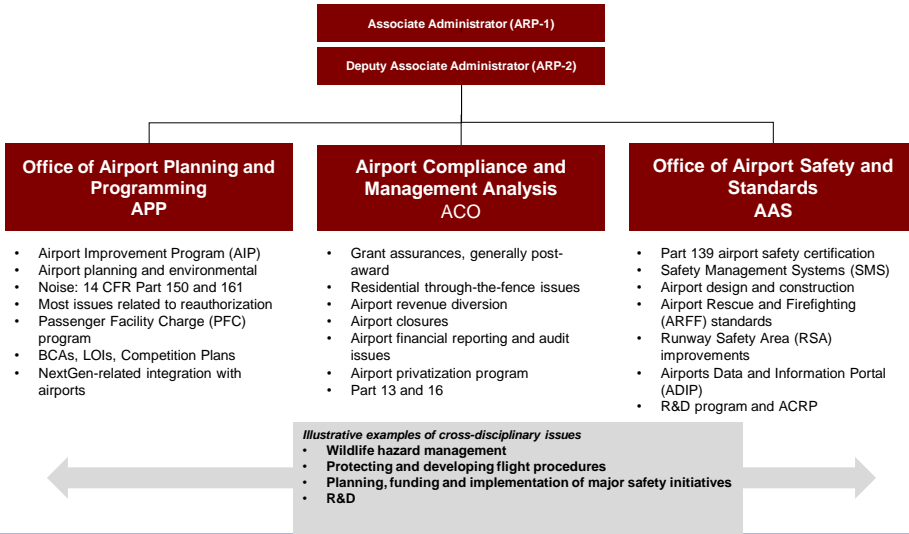

- **19,636** airports overall
- **14,556** airports designated as private-use
- **5,080** airports open to the public
- **3,304** existing airports in the National Plan of Integrated Airport Systems (“NPIAS”)
- **520** airports certificated under Part 139
commercial service by aircraft with 9 or more seats
- **396** primary airports
scheduled commercial service with at least 10,000 annual enplanements

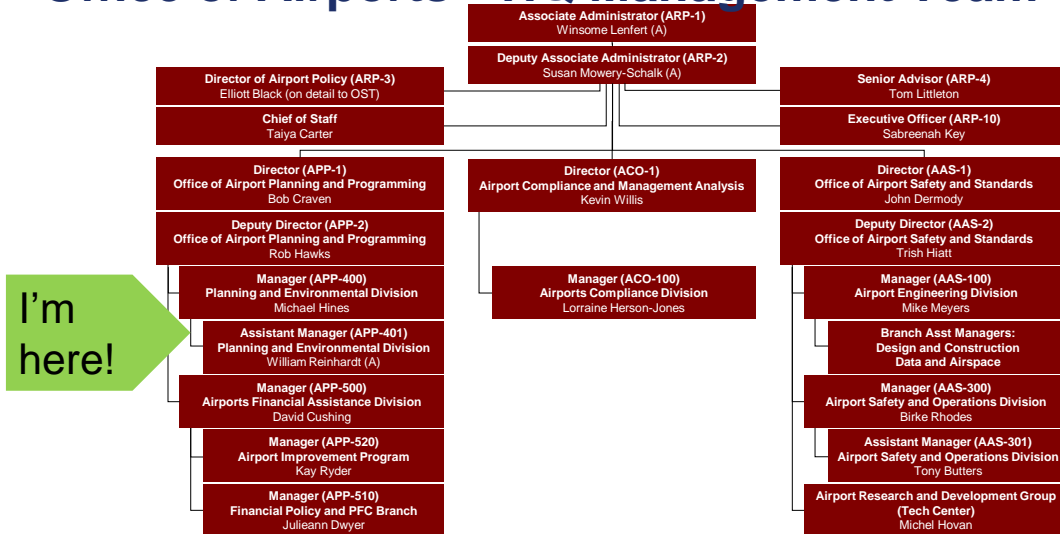

ARP's interrelated areas of concern

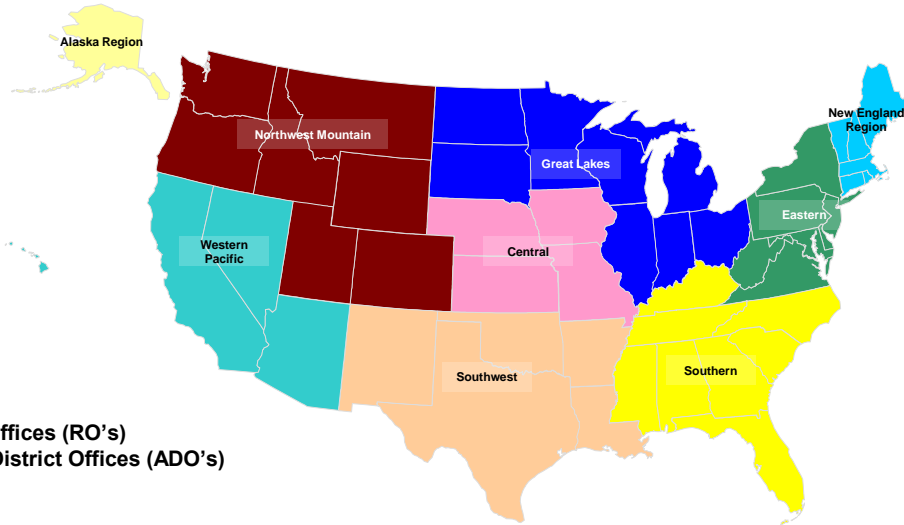

Office of Airports—HQ Directorates

Office of Airports—HQ Management Team

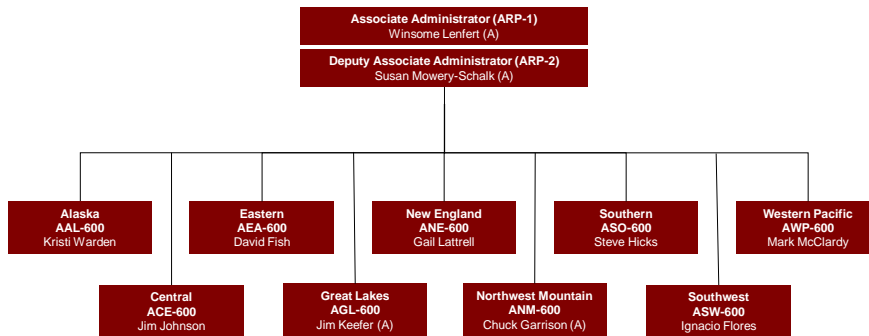

Office of Airports—Regional Organization

ATO Service Centers

Office of Airports—Regional Office Management Team

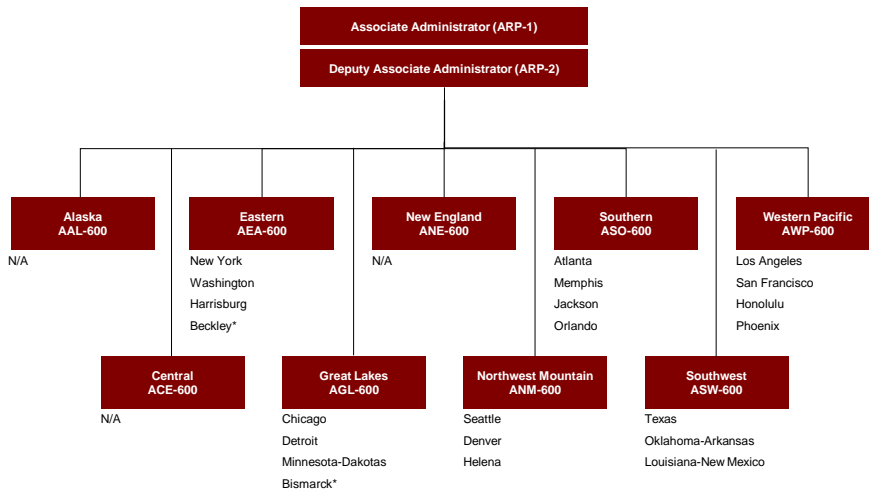

601=Deputy
610=Planning/Env/Finance
620=Safety and Standards

Online:

https://www.faa.gov/airports/news_information/contact_info/regional/

Office of Airports—Airports District Offices (ADO's)

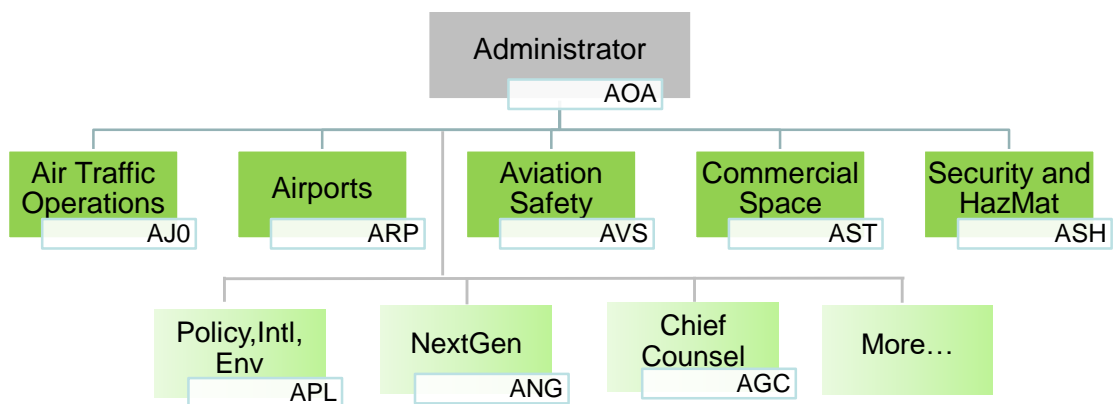

*Field Offices

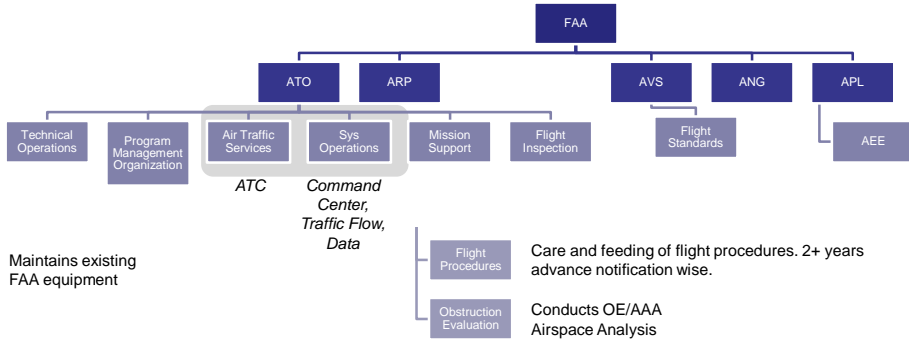

FAA Overview

We are
Airports

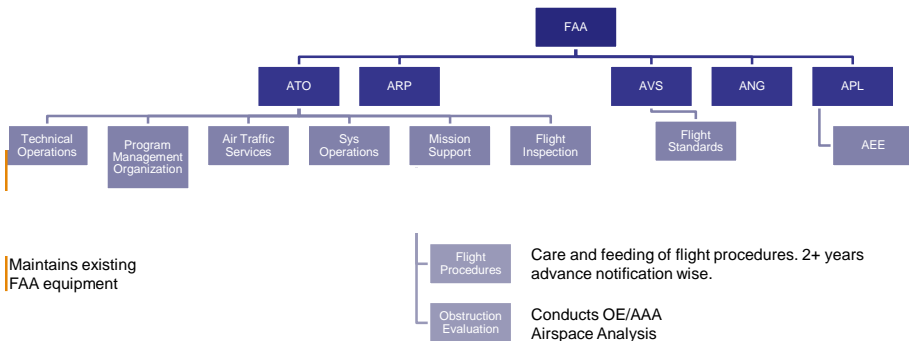

FAA Organization

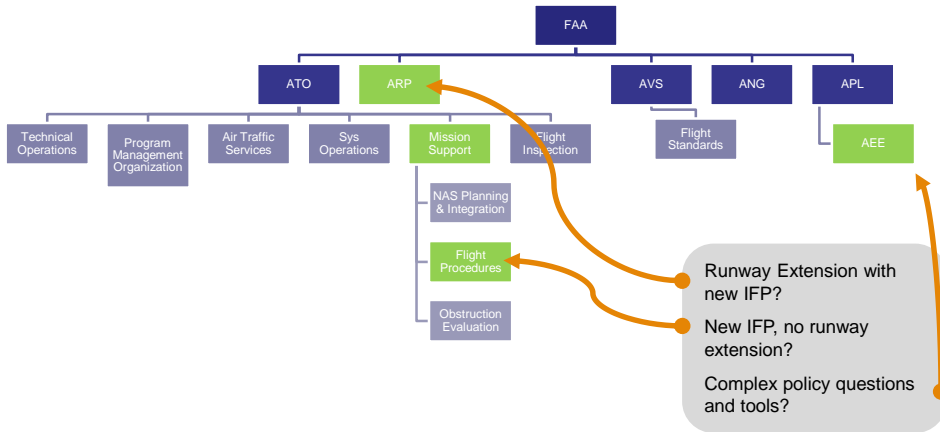

FAA Organization

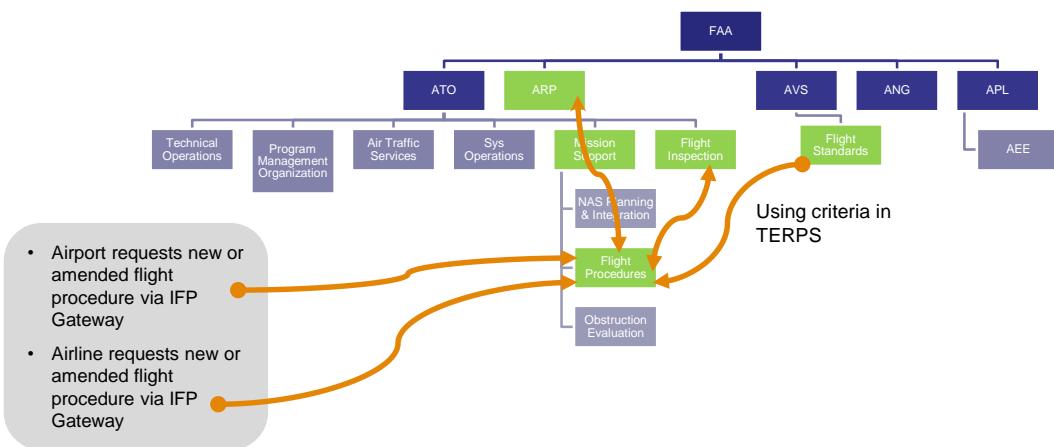

FAA Organization

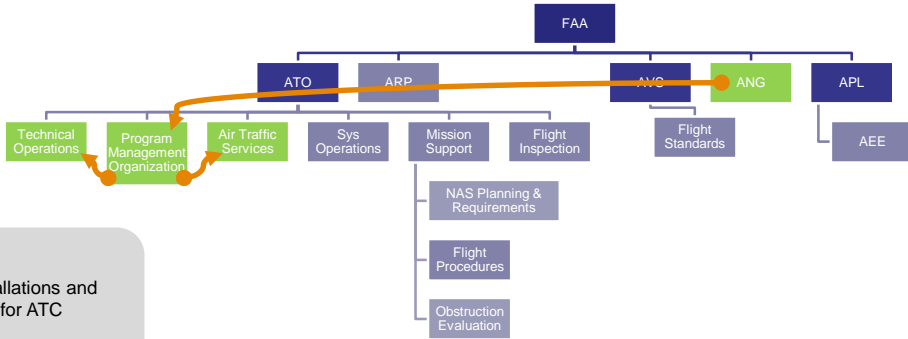

FAA: NEPA

FAA: Developing an Instrument Flight Procedure

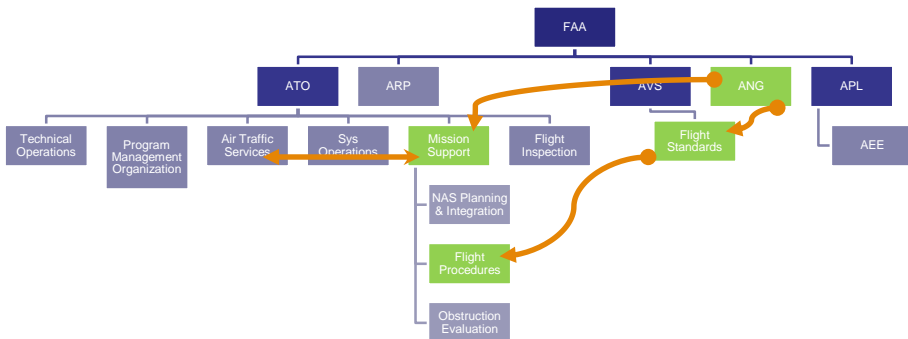

FAA: NextGen

E.g.:
ADS-B Installations and Automation for ATC services
Data Communications

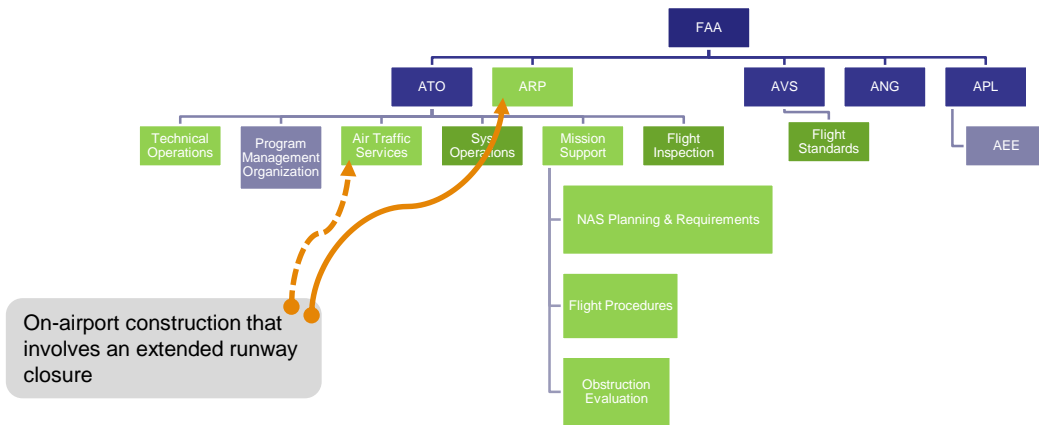

FAA: NextGen

Advanced Flight Procedures
(e.g., Advanced RNP concepts)

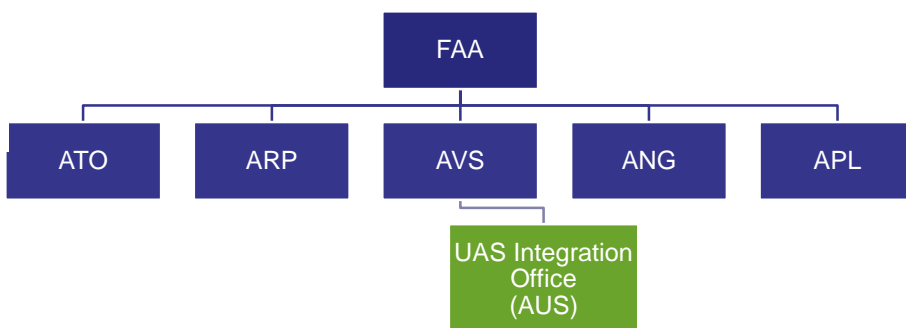

FAA: Construction

Federal Aviation
Administration

FAA: UAS

Federal Aviation
Administration

ATO Coordination

- **NAS Planning and Requirements**

- Provides an interface into the ATO for external customers such as states, municipalities, airports, and other public and private entities
- Gateway to the ATO

Who to contact?

- **ARP: Start with the ADO, normally**
- **ATO: Start with NAS Planning and Requirements lead in each Service Center**
 - https://www.faa.gov/about/office_org/headquarters_offices/ato/service_units/mission_support/sc/

Governance: Laws, Regulations, and ‘Guidance’

1	Laws are passed by Congress and enacted by the President	FAA’s authorizing statute Annual appropriations bills FOIA, NEPA
2	Regulations are rules established by Executive Branch agencies within our statutory authority, using rulemaking process	14 CFR Part 25, 139, 150, 158, etc
3	Orders provide specific direction to FAA employees, including process, criteria, or policy... <i>but also used by external stakeholders</i>	AIP program 5100.38, 5090.5 Environmental review 1050.1, 5050.4 ATC 7110.65 TERPS 8260.3
4	Advisory Circulars are external guidance on technical and operational matters—ARP makes certain A/C’s <u>mandatory</u> for certain types of obligated airports or certain types of projects	150/5300-13 Airport Design 150/5325-4 Runway Length

Transportation Security Administration (TSA) 101

2021 ACC Washington 101 Workshop | April 19, 21, and 23 | ACC Training Hub [#Washington101](#)

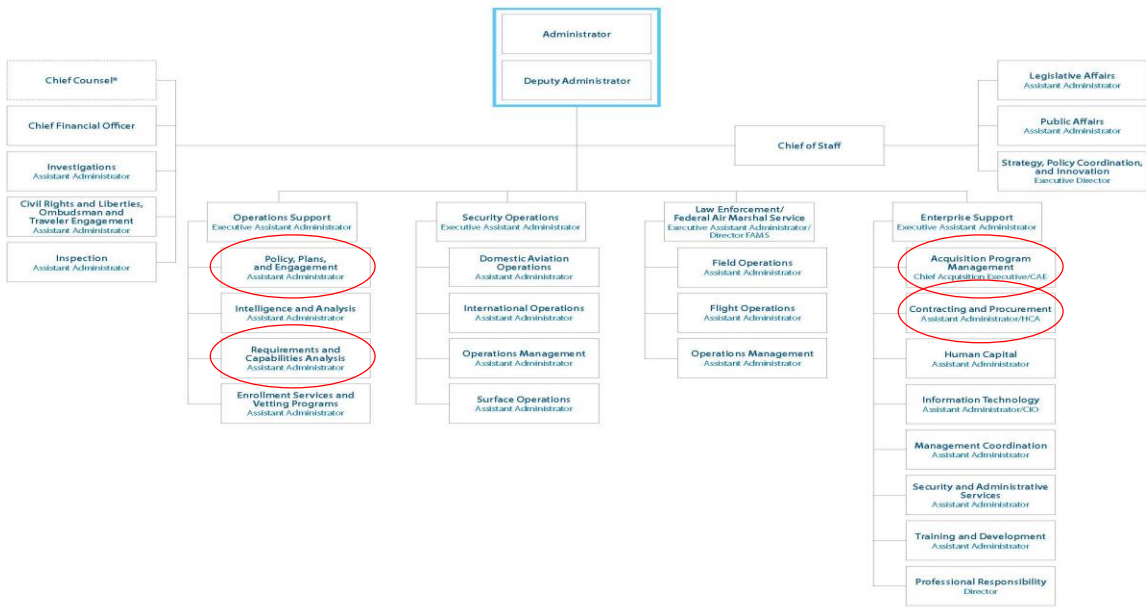

A look Back...

- September 11, 2001
- November 2001: Creation of the TSA as part of the Aviation and Transportation Security Act (ATSA)
- **Factoid:** Department of Homeland Security (DHS) November 2002
- December 2002: Congressional mandate for 100% screening of all checked baggage departing U.S. airports - **ACCOMPLISHED**

2021 ACC Washington 101 Workshop | April 19, 21, and 23 | ACC Training Hub [#Washington101](#)

TSA Organizational Chart

2012099

Key Offices, Branches, Divisions

32

Assistant Administrator: Austin Gould

Requirements and Capabilities Analysis (RCA)

- Strengthen TSA’s operational capabilities
- Analyze the domestic and international risk landscape
- Assess capabilities gaps to develop user requirements
- Drive optimal performance through innovation
- Drives innovation through Innovation Task Force (ITF)

Key Offices, Branches, Divisions (cont.)

Acquisitions Program Management (APM)

- Manages the acquisition, testing, deployment and sustainment of security technology
- Screening systems support
 - Planning: Design phase; funding, etc.
 - Engineering (ATSA): Supports planning & testing
 - Deployment & Logistics: Construction/installation phase
- Test & Evaluation: Developmental, operational, acceptance

Assistant Administrator: Mario Wilson

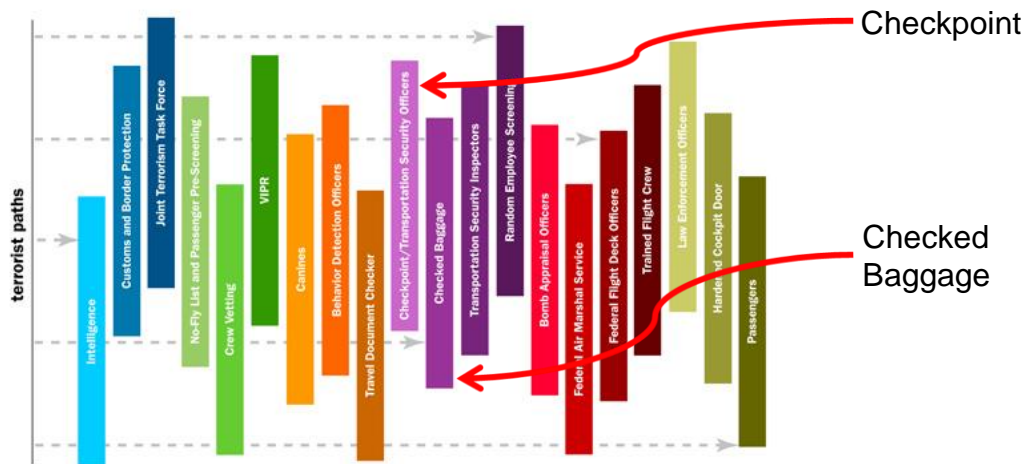

TSA's Primary Responsibilities (Aviation)

Layered Security

Layers of U.S. Aviation Security

2021 ACC Washington 101 Workshop | April 19, 21, and 23 | ACC Training Hub [#Washington101](https://twitter.com/Washington101)

Guiding Documents for Airports & Designers

- Planning Guidelines and Design Standards (PGDS) for Checked Baggage Inspection Systems (CBIS)
- Electronic Baggage Screening Program (EBSP) Funding Policy Memorandum
- Checkpoint Requirements and Planning Guide (CRPG)
- Available at www.beta.SAM.gov (keywords (“PGDS;” “CRPG”))

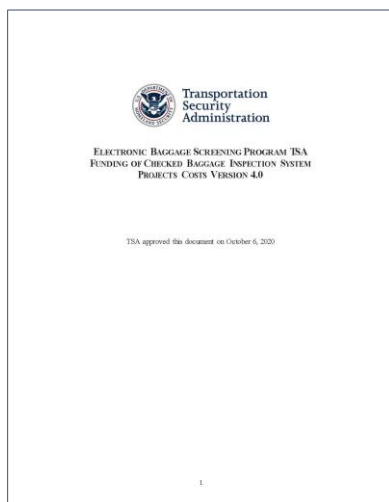

2021 ACC Washington 101 Workshop | April 19, 21, and 23 | ACC Training Hub [#Washington101](https://twitter.com/Washington101)

PGDS

- Borne from the Baggage Screening Investment Study (BSIS) by the Aviation Security Advisory Committee (ASAC) in 2006
- Primary objective:
 - Outline an investment strategy
 - Develop standards of practice that ensure safety, efficiency, and security
- GOAL: Create recommendations and guidelines; not regulatory requirements
- All CBIS reviewed & approved against PGDS
- Revised every 1-2 years; collaboration with PGDS Industry Working Group (IWG)
- *Current version: 7.0; released October 2020*

Funding Policy Memorandum

- “EBSP Funding of CBIS Project Costs”
- Originally extracted from PGDS v. 4.0
- Specifies “allocable, allowable and reasonable” costs for TSA funding
- Codified in Other Transaction Agreements (OTAs) with airports
- Applies to new inline CBIS and Explosives Detection Systems (EDS) Recapitalization projects
- *Current version: 4.0; released October 2020*

CRPG

- First published December 2008 as the Checkpoint Design Guide (CDG)
- Developed in concert with the American Recovery and Reinvestment Act (ARRA) of 2009
- GOAL: Standardize passenger screening checkpoints nationwide
- Revised periodically as new equipment becomes available
- *Latest version published May 2020*

Ongoing Efforts

- Legacy EDS Recapitalization
 - Replacement of technologically obsolete equipment
 - Nationwide effort
- Checkpoint Computed Tomography (CT) deployment
- CBIS Gap Analysis
 - Standards compliance for legacy CBIS
 - Effort to establish funding through congressional request
